

The evolving status of Vitamin D

Scientific Education Symposium (SES) supported by:
Australasian Association of Clinical Biochemists (AACB) – NZ Branch

Clinical Education Centre, Auckland City Hospital, **Tuesday 25 November 2008**
Programme runs **from 10 am – 3pm**, with lunch included.

This Symposium brings together leading experts and will address vitamin D in relation to areas including bone health (Andrew Grey, Auckland), immunity (Cameron Grant, Auckland), diabetes and cardiovascular disease (Robert Scragg, Auckland) and malignancy (Tony Reeder, Otago). Also to be covered are analytical aspects (Andrew Wootton, Melbourne), epidemiology (Murray Skeaff, Otago), UV levels in NZ (Richard McKenzie, NIWA - Lauder) and what constitutes an adequate level (John Livesey, Christchurch).

It is intended to be of interest to a broad spectrum of Health Professionals, including Physicians, General Practitioners and Public Health Specialists, as well as the Laboratory Community.
